

BREAST IMAGING

COMPREHENSIVE SCREENING AND DIAGNOSTIC CARE

WE BRING BRILLIANCE TO HEALTH & WELLNESS

When it comes to breast care, your patients look for fast, accurate answers in a trusted environment. At RAYUS Radiology, we offer a full continuum of screening and diagnostic services, from annual 3D screening mammograms and breast MRIs to a full range of biopsy services and breast cancer risk assessment.

ON-SITE, SUBSPECIALIZED BREAST RADIOLOGISTS

Exams are read by board-certified radiologists who are on-site and subspecialized in breast imaging, breast cancer, and early detection. They have extensive experience in all areas of breast imaging and intervention. They are available for consultation on our radiologist line.

ADVANCED IMAGING SERVICES

- (Tomosynthesis) mammography
- Newest generation of breast ultrasound
- Biopsy: stereotactic, ultrasound or MRI-guided
- Breast MRI
- Breast cancer risk assessment
- 3T wide-bore MRI
- Bone Density (DXA)
- Lymphangiogram (LGI)

OUR ADVANTAGE

- One place for all screening and diagnostic imaging needs
- Advanced technology to capture the clearest images possible
- On-site subspecialized, board-certified breast radiologists
- Bi-lingual care coordinators dedicated to women's services
- Insurance specialists are available to assist with pre-authorizations
- Your patient will be guided through the exam by our compassionate staff
