

INTERVENTIONAL SERVICES

AT RAYUS RADIOLOGY

WE BRING BRILLIANCE TO HEALTH & WELLNESS

When your patients need vascular treatments or other interventional radiology services, it's important to have a partner you can trust.

At our DeSoto center, we offer minimally invasive solutions for a variety of vascular conditions. These services are performed in a comfortable outpatient setting, costing far less than services performed in a hospital-based interventional radiology environment.

OUR COMPREHENSIVE INTERVENTIONAL SERVICES INCLUDE

- Doppler technology to diagnose vascular disease throughout the body
- Peripheral artery disease (PAD) treatment, including atherectomy, angioplasty and stenting
- Venous disease treatment, including laser ablation, stab phlebectomy, sclerotherapy and varicocele embolization
- Uterine fibroid embolization (UFE)
- Kyphoplasty/vertebroplasty
- Biopsies
- Therapeutic injections
- Central lines/venous access, including chest ports, central lines and dialysis catheters for chemotherapy and hemodialysis

BENEFITS TO YOU AND YOUR PATIENTS

- Access to an independent interventional radiology care provider – we will respect your patient/provider relationship and are committed to you retaining your patient
- Peer-to-peer consultations with our interventional radiologists
- Dedicated healthcare providers who will call you to discuss your patients' treatment options
- Access to your patients' results through our portal for medical professionals – insideRAYUS.com
- High-quality care with a patient-centered approach
