INSURANCE NAME AND ID/ POLICY NUMBER	CURRENT CLINICAL CHART NOTES***	DIAGNOSIS
<p>This helps us quickly contact the correct insurance plan and obtain a timely authorization for your patient's exam.</p>	<p>Having chart notes ready to submit with the authorization request can help speed up the process. To expedite pre-authorization, please provide the following information via fax, phone or secure email:</p> <ul style="list-style-type: none"> • Current signs and physical exam findings • Specific injury or trauma (if applicable) • Physical therapy and how long (if applicable) • Any past diagnostic imaging related to the body part being imaged (reports and images) • Any current medications 	<p>Most insurance companies prefer an ICD-10 diagnosis code, if available. However, if the ICD-10 code isn't available, a general diagnosis (such as knee pain or other symptoms) or a "rule out" diagnosis can still be helpful.</p>

* Note that authorizations will only be provided when permitted by the patient's payer.

** Some payers may require additional information.

*** NOTE ON STAT AUTHS: Each insurance company defines the parameters of STAT differently. This may vary from 4 to 48 hours depending on the plan. RAYUS's insurance specialists will pursue authorization when clinical chart notes are provided. In some cases, the plan may require the referring provider to speak with the plan medical director. In this instance, RAYUS will notify your office and ask that you complete the authorization process.
